

Qrecon

Qrecon is a fully automated web-based Hand Receipt Reconciliation System specifically designed for United States Department of Defense Installations world wide. It is an extended management system tool for Dpas. This automated system is based on data stored with Dpas software system. It comes with complete installation manual and instructions for users. No programmer knowledge is required to install and maintain this feature rich Reconciliation System. Qrecon guarantees to evade the complexity and difficulty involved in hand receipts reconciliation process for decades.

Qrecon Features High-lights:

More than 100 million in combined Federal Savings.

Qrecon is found to save millions in dollar savings to the Federal Government. This revolutionary cost saving software system is first of its type . Click here to see more details on this.

Qrecon is not a Job Reduction Tool.

It is an activity stream-liner product. It streamlines your hand receipts holder (HRH) reconciliation process to a State of the Art process utilizing the existing protocol of your very existing personnel or human resources department.

AutoRecon feature of the system reconciles your HR Items automatically.

It does it all by itself. No user intervention is required. In most cases, AutoRecon is guaranteed to reconcile upto 95% or more of your HR items, in less than 60 seconds..!!

Open end reconciliation Methodology.

This is one of the most exciting feature of Qrecon. Qrecon displays HR items under appropriate HRH account numbers regardless of its original location. This feature will provide comfort and peace to many HR Holders struggling to find their missing HR items
